CURRENT COURSE DESCRIPTION

This is the first of three courses exploring Internet Policy: Principles and Problems, which is part of CU Boulder’s Masters of Science in Data Science and Master of Science in Computer Science programs on Coursera. This course builds an interdisciplinary policy framework to critique and develop regulatory approaches to real-world problems on the Internet. Learners then use the framework to develop a definition of broadband to improve the Digital Divide and to evaluate net neutrality regulations.

INDUSTRY ALIGNMENT BY JOB ROLE

JOB ROLE	CURRENT SCORE	PROJECTED SCORE	POINT GAIN	PRIORITY
AI Engineer	54.3	87.0	+32.7	HIGH
Data Scientist	54.3	67.3	+12.9	LOW
ML Engineer	50.6	77.5	+26.9	MEDIUM
Applied Scientist	49.0	77.7	+28.8	MEDIUM
Machine Learning Engineer	42.6	69.4	+26.8	MEDIUM
MLOps Engineer	28.4	61.0	+32.6	HIGH

RECOMMENDED TOPICS TO ADD

Keywords highlighted in gold (**example**) appear as gaps across 3 or more job roles.

Deep Learning

2 of 6 roles

cnn

training

PRIORITY RECOMMENDATIONS FOR INSTRUCTORS

1

MEDIUM

Consider Deep Learning content — relevant to 2 industry roles. Could be introduced via case studies or optional readings. Key terms: cnn, training.

GAP KEYWORDS BY ROLE

AI Engineer	54.3 → 87.0 (+32.7 pts)

Methodology:

Scores (0–100) reflect TF-IDF cosine similarity between course catalog descriptions and a corpus of 100 LinkedIn data science job postings (collected June 2026, filtered to postings with ≥200 applicants). Gap keywords are terms that appear frequently in job postings for a given role but are absent or underrepresented in the current course description. "Projected score" shows the estimated alignment after integrating the top 5 suggested keywords. Analysis was conducted by the CU Boulder MSDS Curriculum–Industry Alignment project team.
